## P&P R-Alf Rescue Pulley System

The R-ALF Pulley is the latest innovation in Rescue, Confined Space working and Work Suspension Systems.

The R-ALF Pulley has an over-speed brake built in so that the Pulley will lock on and hold when a fall occurs. The load rated Becket Eye on the R-ALF means that it can be used in combination with Prusik Pulleys to obtain either a 3:1 or 5:1 Mechanical Advantage System.

The system can also be used by the operator as a RPD (Rope Position System) in suspension. The R-Alf Pulley is rated for lifting materials.

The unique design of the R-ALF (design patent applied for), means that an internal brake is not required and therefore it is capable of several thousand cycles and many arrests (minimum 12 monthly service intervals apply).

CE – PPE Test Directive  
ANSI - Certified to Z359  
2 Man Rated  
SWL 250kg

System available as:  
R-Alf 3:1 40mtr – (10mtr Effective Working Length)  
or  
R-Alf 5:1 60mtr – (10mtr Effective Working Length)

System Includes, Roll Top Bag & 2m attachment round sling.

\*Hand jammer – pull assist available at extra cost
